

OBJECTIVE

Computer Science undergraduate interested in Applied AI, graph-based machine learning, and intelligent recommendation systems. Experienced in building AI-powered applications using FastAPI, Neo4j, FAISS, Redis, Docker, and PyTorch Geometric. Seeking research-oriented opportunities to contribute to scalable AI systems, graph intelligence, and real-world machine learning applications.

EDUCATION

|                                                                                                           |           |

TECHNICAL SKILLS

- Programming Languages:** Python, Java, JavaScript, SQL
- Machine Learning & AI:** PyTorch, PyTorch Geometric, Scikit-learn, Pandas, Graph Neural Networks, GraphSAGE, NetworkX, FAISS
- Data Preprocessing:** Data Preprocessing, Feature Engineering, Model Evaluation, Data Analysis
- Backend & AI Systems:** FastAPI, Redis, Celery, Docker, REST APIs
- Databases:** PostgreSQL, Neo4j, Firebase Firestore, MongoDB
- Development Tools:** Git, GitHub Actions, CI/CD Pipelines
